SC-8220 & SC-8220F

1+1 Pocket Value & Multi Currency Counters

Make Cash Handling Easy and Secure

Reduce the manual cash handling and get full control of your cash. Introducing the SC-8220, a high quality value and multi-currency counter that delivers outstanding results at low cost.

Full Flexibility for the Distributor with Minimal Effort

The SC-8220 comes with a preset of around 20 currencies. One set of currencies will be available for each main geographic region containing main international currencies and regional currencies. The distributor has the flexibility to reduce the number of available currencies to each client depending on the local sales organization. Update of notes will be available by a simple SD Card insertion.

Full Flexibility for the End User in an Enriched User Interface

It counts and verifies one currency with ease and accuracy, but when it comes to handling multi-currency the new SC-8220 also proposes two new modes to avoid time consuming and repetitive manipulations:

- Multi - it accepts different currencies in one single operation and provides a total note count split into the various currencies found within the note bundle
- Auto - The machine identifies the currency of the first note in the bundle and sets itself in the mode to count this currency and to reject all other currencies. As soon as the pockets are empty, the machine turns back to the auto mode for the next notes acceptance. In this mode mixed notes of many different currencies are counted without any keyboard operation.

The user can also reduce the number of currencies available through the currency button in order to have only the most current one set by one finger click, while quickly accessing the full list to activate unusual ones.

UV LED Bar

A new patented UV LED bar placed under the machine will help manual authentication of bad notes. The UV lights will turn on automatically for a few seconds when the notes are rejected.

SC-8220F New Fitness Version

New version with additional features:

One-step fitness mode

FIT and UNFIT notes go to corresponding pockets. This is suitable when authentication has been done in mass quantity in advance

Two-step fitness mode

Although with two pockets, the machine can still sort the FIT, UNFIT, and CF notes clearly by using two-step fitness mode

Mechanical thickness sensor for accurate tape detection

Integration and Backward Compatibility

For easy back office integration SC-8220 is provided with its own protocol. All transactions can be seen and managed using the free software.

Front Access Features

The SD card slot is placed on the front of the machine, thus making the update of the machine very simple. If an SD card is kept in the machine, the SD card will contain the list of all notes counted or rejected, including serial numbers of the notes read.

Technical Specifications SC-8220

	SC-8220	SC-8220F
Dimensions (W x D x H)	275 mm x 260 mm x 319 mm (10.83"x10.24"x12.56")	275 mm x 260 mm x 319 mm (10.83"x10.24"x12.56")
Weight	Approx. 9.3 kg (20.5 lb)	10.50 kg
Voltage	100-240V / 50/60 Hz	100-240V / 50/60 Hz
Power consumption	Max 50W	Max 80W
Hopper Capacity	Max 500 notes	Max 500 notes
Speed	800 notes per minute (serial number) 900 notes per minute (value counting) 1,100 notes per minute (free counting)	750 notes per minute (fitness) 750 notes per minute (serial number) 900 notes per minute (value counting) 1,100 notes per minute (free counting)
